INTERNSHIP AS CAREER ENTRY

It is not easy to find an appropriate and exciting role in the healthcare industry right after graduating or earning a PhD. There is often a lack of right contacts and professional support.

AurigaVision accompanies you on your search for a suitable entry!

Many companies in the pharma and medtech industry have a huge demand for additional, well-trained employees. But many cannot offer a permanent role immediately. An employment as an intern can therefore help both parties, the company and you as candidate.

An internship is the ideal entry into the pharma and medtech industries for you. In many cases both sides are seeking for a takeover after completion of the traineeship.

WHAT CAN YOU EXPECT FROM AN INTERNSHIP?

Work Experience

Collect first professional experience for a quick entry into the healthcare industry

Insights

Gain insights into the organization of pharmaceutical companies

Understanding

Obtain an overview of the potential jobs in the pharmaceutical industry

Contacts

Establish professional contacts as the basis for your further career

WHAT REQUIREMENTS DO YOU HAVE TO FULFILL?

An internship is suitable for university and PhD graduates that have completed for example one of the following studies:

- o Medicine
- o Pharmacy
- o Biology
- o Biochemistry
- o Health economics
- o etc.

Your interest in a career in the healthcare industry is the fundamental requirement.

«Landing your first job is the biggest challenge.»

Susanne Rietiker, CEO

FAQs

How long does an internship last?

The internship lasts usually 6 to 12 months. Over this period, you are employed either by the company directly or through AurigaVision.

How can you apply for an internship?

Please send your documents to **jobs@aurigavision.com**. An AurigaVision employee will contact you to discuss the further procedure.

What documents are required?

For a comprehensive assessment of the application AurigaVision needs your CV and diploma as well as the certificates of all internships and part-time jobs.

What is the selection process?

The application documents received are reviewed. If appropriate, an interview with a consultant of AurigaVision will follow. Afterwards AurigaVision

will send your dossier with your agreement to the relevant company. If the company is interested, an interview is held with the persons in charge on site. In case of a commitment of both parties, a contract is concluded.

What are your tasks during the internship?

You will work in the selected department as junior employee. After your professional onboarding, you will take care of projects independently. Thereby you will gain practical experience «on the job».

What are your earning possibilities during the internship?

A usual trainee salary is paid, which ranges from CHF 3'500 to 6'500 per month depending on your degree, company and position. Additional payments (expenses, etc.) are occasionally added on top of this.
